ABSTRACTED-PUB-NO: KR2001002032A

BASIC-ABSTRACT:

NOVELTY - A membership registration agency device of Internet membership sites is provided to make a service provider server to automatically transmit a pre-registered user information to many Internet sites provided from the service provider server, when the user registers his private information into the service provider server, or automatically transmits a pre-registered user information to a user-desired Internet site.

DETAILED DESCRIPTION - A membership registration agency device of Internet membership includes many PCs(20), and a service provider server(30). The service provider server records each private information of many users as a predetermined data, transmits the recorded user private information to a corresponding Internet site(40) according to the user's selection if the user is connected to any Internet site(40) requiring a user information input, and thus performs a membership registration agency action. Thereby, the user's inconvenience can be remarkably reduced.
